

We bake tailored payment solutions that improve customer satisfaction and profitability.

Update or overhaul, Paystri's payment solutions enable businesses to deliver a frictionless and rewarding customer experience. Whether the transaction happens in-store or on-the-go, our payment experts provide all the ingredients you'll need to make transactions and processing easy and affordable. And all this backed by our world-class customer service.

Accept payments any way your customer wants to pay.

Our payment acceptance solutions enable your business to accept chip, swipe, and contactless credit card payments. Below are some of the Paystri payment acceptance solutions that are helping businesses thrive.

Paystri offers a wide variety of payment equipment and software for your business.

We feature the industry's latest and most popular payment technology, terminals, PIN pads and software solutions.

Visit paystri.com to learn more about how we are helping businesses like yours achieve growth and opportunity through payments.

KEY PAYSTRI PAYMENT ACCEPTANCE SOLUTIONS

In-Store

Whether you're looking for a bundled payment acceptance package or a standalone all-in-one device like Clover Go Bluetooth (see below), Paystri can implement a payment solution that allows you to accept mobile, chip card and mag stripe countertop transactions quickly and securely.

eCommerce

Paystri offers payment acceptance and processing solutions for a wide range of eCommerce transactions. We offer multiple eCommerce payment gateways to make it simple to accept electronic and credit card payments online or over the phone. Through our virtual terminals we offer secure data transmission for you and your clients.

Mobile

Our payment solutions work seamlessly with Google Pay, Apple Pay, Samsung Pay to name a few. Paystri enables your business to accept credit card payments anytime and anywhere so you can take your business on the road and take your payments on the move.

The Clover Go Bluetooth is a fully integrated card reader that accepts NFC, EMV and mag stripe transactions all in one sleek device. This powerful reader is able to process EMV transactions in less than 3.5 seconds.
